

# ARE YOU A EUROPEAN SME PERFORMING COLLABORATIVE DATA MANAGEMENT IN THE FISHERIES, MARINE, ENVIRONMENTAL & ECOLOGICAL DOMAINS OR IN THE AQUACULTURE SECTOR?

## THE BlueBRIDGE COMPETITIVE CALL FOR SMES IS OPEN

The main objective of this call is to **support 5 European SMEs** in addressing data management challenges that require **collaboration between different actors** (e.g. data providers, customers of the SME, external experts, scientists or consultants) and **integrated data management solutions** which combine different technologies and resources.

### What are the benefits?

- Easy access to heterogeneous datasets.
- On-demand access to data (no need to download data and harmonise data).
- A unique environment where you can combine data and/or easily integrate your own software/application (R, Java, JavaScript, Python).
- No need to worry about user management, security, accounting, monitoring and alerting.
- No need to worry about the set up of computational resources and about storage resources.
- Free consultancy from the BlueBRIDGE consortium.

### Who can participate?

- The call is open to all the SMEs established in the EU Member States.
- Proposals will only be accepted from a single party who qualify as a Small Medium Enterprise as defined in the EU recommendation 2003/361.
- Proposals from consortia will not be accepted.
- Proposers can submit up to a maximum of three proposals. All three will be considered.

## WHAT WE OFFER

Successful SMEs will be able to set up a **tailored virtual collaborative environment** (VRE) that they can use to address their data management challenges. The virtual environment is a web-based application that each SME will build on the basis of its own needs in terms of datasets, services and technologies and data analytics.
